Summary

I'm a diligent full time university student dedicated to team collaborations and providing great customer service. Seeking different opportunities to further enhance my customer service and develop my technical problem-solving skills where my past experiences have prepared me to work in different situations. I'm a self-motivated individual whilst being patient and will learn things that pique my interest.

Technical Skills

Programming – Python

I have of experience in programming through python making use of both the internal and external libraries to complete many tasks. These includes the use of Pygame, Tkinter, Object-oriented programming, and some practice in algorithm work. I have used to an extent Django to make apps and add databases to them.

Programming – HTML/CSS/JavaScript

Utilising HTML, CSS, and JavaScript to complete recreational tasks such as building a website (Currently still in development).

Programs used

Microsoft Visual Studio, IDLE, PyCharm, Microsoft office 365, PostgreSQL, Django through CMD, Jupyter Notebook.
